- Route/workflow folders, documents, and document bundles for action
- Eliminate filing mistakes, lost and misplaced files
- Recapture floor space for growth

Compliant Storage

Product: KOMpliance

- Compliance with SEC 17a-4, NASD, SOX and other regulations
- Secures data from unauthorized access and tampering
- Ensures information integrity and availability
- Enforces retention
- Patented e-WORM hard disk based archiving

Vendors team to simplify meeting compliance and improve firm-wide efficiency

The benefits of going paperless are compelling. Businesses worldwide are experiencing efficiency gains, cost savings, and enhanced bottom lines as a result of eliminating paper. However, going paperless is not always as simple as flipping a switch. This is most evident in industries where regulatory compliance is a requirement. Government and industry regulations for enforcing protection, archiving and access policies are increasingly becoming more complex and taxing on organizations. Cabinet NG, Kodak and KOM Networks have teamed to provide the industry's first integrated turnkey approach to managing data and complying with various policies and regulations.

Efficient • Secure • Integrated • Cost Effective

Critical elements of going paperless

CAPTURE

Turning a paper-based operation into a paperless environment will require scanning of physical documents into the document management system. Kodak scanner models i1120, i1220 and i1320 are excellent choices. All are certified compatible with CNG-SAFE document management software which brings confidence that the right scanner is available for the job. Small, powerful and packed with features and benefits, these KODAK scanners meet your scanning needs with an unprecedented combination of performance, value and price. KODAK scanners transform your paper documents into high-quality digital images that can be managed, sent, filed, and found using CNG-SAFE.

FILE AND MANAGE

Efficiently managing electronic files requires structure. Without a robust electronic filing structure, finding important information can be a shot in the dark. Time is of the essence when you need to produce a document whether for a client or a compliance audit. The CNG-SAFE document management solution gives you the structure, controlled access, workflow, and instant retrieval you need to succeed in managing your business efficiently. CNG-SAFE can also integrate with most CRM, and other business applications using the Retriever and Synchronizer add-ons, to tie all your business processes into one cohesive system.

STORE

All electronic documents must be stored, retained and protected. Now you can store your documents with additional confidence and within compliance. Designed specifically to allow you to meet the increasing requirements of highly regulated archiving and compliance needs without sacrificing your business requirements, KOMpliance provides you with everything you need to archive your data pre-installed, pre-configured for use with CNG-SAFE and ready to add to your network.
